Traffic Managen						
Document	Revision	Date	Description	Author	Approved	
Control	4	30/11/2016	Revised to reflect contractual arrangements for construction. Acronym "PC" refers to "Principal Contractor"	JS/SL	JS	
Background	This Traffic Management Plan (TMP) is one of the Environmental Plans under the Environmental Management Strategy for the Clyde Terminal Conversion Project					
Objectives	<ul> <li>Minimise and manage all traffic impacts to the environment and potentially affected receivers throughout demolition and construction phases of the Development.</li> <li>Ensure compliance with relevant legislative and other requirements including the DC conditions, mitigation measures in the Environmental Impact Statement (EIS) and Response to Submissions (RTS) Report; and Environment Protection Licence (EPL) 570.</li> </ul>					
Performance Criteria	<ul> <li>Minimise the impacts of the Works on the local and regional road network;</li> <li>Minimise conflicts with other road users; and</li> <li>Educate truck drivers to use specified routes.</li> </ul>					
Key Performance Indicators	<ul> <li>No traffic related issues raised by the community and stakeholders during demolition and construction.</li> <li>No damage to public infrastructure including roads during the execution of the Works.</li> </ul>					
Legislative	Development Consent SSD 5147 [14 January 2015]					
Requirements	PROTECTION ( INFRASTRUCT	URE (a) str	2.Prior to the commencement of construction or demolition, the Applicant shall: prepare a dilapidation report of the public infrastructure in the Vicinity of the site (inclue eet trees and furniture); and submit a copy of this report to the Secretary and Council.	ding roads, kerbs, foot	paths, nature trip,	
		B1	3.The Applicant shall:			
			repair, or pay the full costs associated with repairing, any public infrastructure that is d molition; and	amaged during constr	ruction and	
			relocate, or pay the full costs associated with relocating, any public infrastructure that nstruction or demolition.	needs to be relocated	as a result of the	
	TRANSPORT A ACCESS Car Parking	ор	5. The Applicant shall provide sufficient parking facilities on-site, including for heavy ve erational personnel, to ensure that traffic associated with the Development does not uti rking facilities.			

## Clyde Terminal Conversion Project – Environmental Management Strategy

	<ul> <li>C36. The Applicant shall prepare and implement a Traffic Management Plan for construction and demolition, to the satisfaction of the Secretary. The plan must: <ul> <li>(a) be prepared by a suitably qualified person;</li> <li>(b) be prepared in consultation with Council and RMS;</li> <li>(b) be approved by the Secretary prior to the commencement of construction or demolition;</li> <li>(c) detail the measures that would be implemented to ensure road safety and network efficiency during construction and demolition</li> <li>(d) detail heavy vehicle routes, access and parking arrangements;</li> <li>(e) include a Driver Code of Conduct to: <ul> <li>minimise the impacts of construction and demolition on the local and regional road network;</li> <li>minimise conflicts with other road users; and</li> <li>ensure truck drivers use specified routes.</li> </ul> </li> <li>(f) include a program to monitor the effectiveness of these measures; and</li> <li>(g) if necessary, detail procedures for notifying residents and the community (including local schools), of any potential disruptions to routes.</li> </ul> </li> </ul>			
ne Traffic Impact Assess	<ul> <li>(b) be prepared in consultation with Council and RMS;</li> <li>(b) be approved by the Secretary prior to the commencement of construction or demolition;</li> <li>(c) detail the measures that would be implemented to ensure road safety and network efficiency during construction and demolition</li> <li>(d) detail heavy vehicle routes, access and parking arrangements;</li> <li>(e) include a Driver Code of Conduct to: <ul> <li>minimise the impacts of construction and demolition on the local and regional road network;</li> <li>minimise conflicts with other road users; and</li> <li>ensure truck drivers use specified routes.</li> </ul> </li> <li>(f) include a program to monitor the effectiveness of these measures; and</li> <li>(g) if necessary, detail procedures for notifying residents and the community (including local schools), of any potential disruptions to routes.</li> </ul>			
	<ul> <li>(b) be approved by the Secretary prior to the commencement of construction or demolition;</li> <li>(c) detail the measures that would be implemented to ensure road safety and network efficiency during construction and demolition</li> <li>(d) detail heavy vehicle routes, access and parking arrangements;</li> <li>(e) include a Driver Code of Conduct to: <ul> <li>minimise the impacts of construction and demolition on the local and regional road network;</li> <li>minimise conflicts with other road users; and</li> <li>ensure truck drivers use specified routes.</li> </ul> </li> <li>(f) include a program to monitor the effectiveness of these measures; and</li> <li>(g) if necessary, detail procedures for notifying residents and the community (including local schools), of any potential disruptions to routes.</li> </ul>			
	<ul> <li>(c) detail the measures that would be implemented to ensure road safety and network efficiency during construction and demolition</li> <li>(d) detail heavy vehicle routes, access and parking arrangements;</li> <li>(e) include a Driver Code of Conduct to: <ul> <li>minimise the impacts of construction and demolition on the local and regional road network;</li> <li>minimise conflicts with other road users; and</li> <li>ensure truck drivers use specified routes.</li> </ul> </li> <li>(f) include a program to monitor the effectiveness of these measures; and</li> <li>(g) if necessary, detail procedures for notifying residents and the community (including local schools), of any potential disruptions to routes.</li> </ul>			
	<ul> <li>(d) detail heavy vehicle routes, access and parking arrangements;</li> <li>(e) include a Driver Code of Conduct to: <ul> <li>minimise the impacts of construction and demolition on the local and regional road network;</li> <li>minimise conflicts with other road users; and</li> <li>ensure truck drivers use specified routes.</li> </ul> </li> <li>(f) include a program to monitor the effectiveness of these measures; and</li> <li>(g) if necessary, detail procedures for notifying residents and the community (including local schools), of any potential disruptions to routes.</li> </ul>

	(g) if necessary, detail procedures for notifying residents and the community (including local schools), of any potential disruptions to routes.			
	routes.			
• The Traffic Impact Assessment concluded that the Development would result in increases to light vehicle and heavy vehicle numbers during the demolition and construction works. However, this increase in vehicles would not significantly impact the surrounding road network, and as such, the levels of service for impacted intersections are not predicted to change.				
Demolition activities were predicted to add a maximum of 16 heavy vehicles in each direction to transport waste materials.				
• Construction activities were predicted to require approximately one heavy vehicle trip per day to deliver construction materials and initially to mobilise construction plant and equipment. This is in addition to the approximately 257 heavy vehicles that currently access the Site and its adjoining Parramatta Terminal each day, including fuel tankers, waste transport trucks, as well as other delivery and courier vehicles.				
	for additional parking allocations, as existing car parking arrangements at the Site would be adequate to service the needs of the ne demolition and construction works.			
gure D-5A illustrates th	he surrounding road network, the proposed site access and access routes in relation to the Development.

Plan Reference	Source Reference	Aspect	Mitigation Measure	Viva Energy as PC	Contractor as PC	Contractor as PC	Frequency
TMP5	C36(f)	Site inductions	Demolition contractor to include Driver Code of Conduct in staff inductions and refreshed as required. For Construction the Viva Energy contractors are to comply with site rules regarding access routes, seatbelts, speeds and escorts. This information is to be covered in site inductions.	Construction Project Managers (requirements communicated via the Project HSSE Plan)	Saunders Project Manager	Liberty Industrial Project Manager	As required.
TMP6	EIS, AQ1	Truck deliveries	Loads would be covered during deliveries and off-site transportation of materials and wastes. For demolition material, the Load Restraint Guide by the National Transport Commission will be applicable.	Construction Project Managers (requirements communicated via the Project HSSE Plan)	Saunders Project Manager	Liberty Industrial Project Manager	At all times
TMP7		Traffic Management	Transportation of oversized or overmass vehicles or loads will require appropriate permits from the relevant authority (Roads and Maritime Services or Parramatta City Council) prior to movement.	Construction Project Managers (requirements communicated via the Project HSSE Plan)	Saunders Project Manager	Liberty Industrial Project Manager	As required
TMP8	EIS, AQ8	Engine idling	Engines will be turned off while parked onsite when not in use.	Construction Project Managers (requirements communicated via the Project HSSE Plan)	Saunders Project Manager	Liberty Industrial Project Manager	At all times
TMP9	C36(d)	Heavy vehicle access	Heavy vehicle access to the Site will be confined to designated, sealed access roads as shown in <b>Figure D-5A.</b>	Construction Project Managers (requirements communicated via the Project HSSE Plan)	Saunders Project Manager	Liberty Industrial Project Manager	At all times
