

Hydrocarbon Solutions

For all your fuel and lubricants
storage and handling solutions

Let us source everything you need

With over 110 years of experience providing fuel and lubricants to Australia, Viva Energy has the experience and knowledge to ensure that your fluids are stored correctly, dispensed safely and kept clean.

We have partnered with the highest quality hydrocarbon equipment manufacturers to provide your business a simple, one stop solution for the right equipment to maximize fluid and equipment life.

Oil Equipment

From pumps to hose reels and storage for your workshop or mine site, we will help you make the right choice for your application.

Pumps

Pump Dispense Kits

Hose Reels

Storage Containers

Product Labels

Meters

Fluid Management

Fittings and Hoses

Grease Equipment

From the smallest application to the largest we have grease equipment that will help you and your equipment get the right amount of protection at the correct intervals.

Automatic Lubrication Systems

Injectors

Hose Reels

Grease Guns

Grease Press

Single Point Lubricators

Hoppers

Drum, IBC and Hopper Heaters

Fuel Equipment

Safe, effective and secure management of fuel is critical. We specialise in providing advice and the fuel handling equipment you need to ensure safety and security of fuel.

Pumps

Fluid Management Systems

Fuel Dispensing Packages

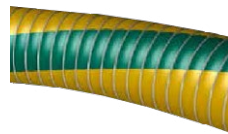

Bowsers

Hose Reels

Fluid Meters

Transfer Hoses

Automatic Tank Gauging

Nozzles and Receivers

AdBlue®

Keep your fleet on the road. We have you covered with the AdBlue® product and equipment you need.

Tanks

Nozzles

Hose Reels

Dispensing Kits

Meters

Pumps

AdBlue® Dispenser

AdBlue®

Workshop Equipment

Keeping your workshop in top shape with help from our technicians, providing advice from the right pumps for you to an easier way to complete oil drains.

Hoists

Tanks

Dispensing Equipment

Waste Capture

Oil Can Crushers

Fluid Evacuation Units

Spill Kits

Cleaning Pumps

Detergent Foamer

Detergents

Filtration & Breathers

Being key elements in keeping your fuel and oil systems clean from contaminants, we have a wide range of TRAP, Expansion and Desiccant Breathers for both bulk tanks and equipment.

Equipment Breathers

Tank Breathers

Desiccant Breathers

Expansion Breathers

Replacement Spin On Filters and Housings for Fuels and Lubes

Replacement Filter Elements for Fuels and Lubes

Inline Filter Housing and Manifolds

Filtration Packages

Our filtration options cover all your requirements - from small systems to large, mobile packages to large skids that have media for particulate removal, water removal and varnish removal.

Bespoke Mobile or Skid Fuel and Lubricant Filter packages for the removal of Particles, Water and Varnish

Storage & Tank Equipment

Our technicians are able to advise about the storage and tank equipment that best suits your needs that also protects your fuel, oil and grease products, and reduces the risk to you, your equipment and the environment.

Dangerous Goods Containers

Bunds

Waste Bins

Overfill Alarms

Tank Vents

Drum/IBC Covers

Signage

Containerized Lube Storage

Fuel Tanks

Bollards

Condition Monitoring

Being a vital tool in understanding the health of your hydrocarbons and equipment, we can provide test kits, analysis, and the equipment required for you to monitor the condition of your equipment.

Oil Sample Pumps

Oil Analysis

Fuel Test Kits

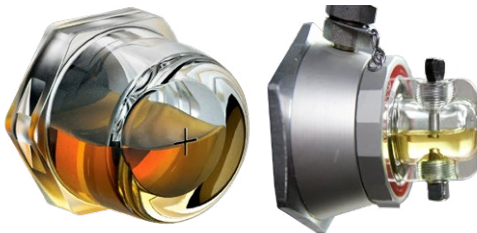

Patch Tests

Fuel Sampling Bacon Bombs

Water Finding Paste

Sight Gauges

Sample Ports

Technical Services

With over 200 years of combined industry experience our technical team can provide you with expert support on your site.

Compliance Audits

Audits to ensure your compliance with the storage of bulk liquids including recommendations to not only ensure best practice but your facility is operating safely.

Lube System Maintenance

Auditing, maintenance and installation of oil and grease lubrication systems. Our technicians can assist to ensure that your equipment is receiving the right amount of lubrication in the correct intervals to help prevent unplanned failures.

Open Gear Inspections

Our highly trained technicians can complete an open gear inspection and review your lubrication system at the same time. Let us help you remove the risk of inadequate lubrication, which can cause unplanned failures and downtime.

Tank Farm Inspections

Our industry specialist technicians can inspect, perform maintenance tasks and source replacement equipment to keep your tank farm in good working order.

Mobile Fleet Grease System Audits

Let our team audit your machines to ensure that you are providing your equipment the right amount of grease to prevent unnecessary wear without over greasing, which could lead to additional expenses.

Product Training

Courses presented by Viva Energy's Technical Team, with over 200 years of combined industry experience. Developed to your specific needs with course subjects including lubrication basics, storage and handling, contamination control and condition monitoring.
