

VERIFICATION OF MAILING & CONTACT LIST

To our nearest neighbours,

We have previously sent you updates about the demolition and removal of redundant refining infrastructure as part of the Clyde Terminal Conversion Project (CTCP).

We are currently reviewing our mailing list as we are about to send further important updates and need to ensure we have the right contact name and details for your organisation/business.

You can help us by:

- ✓ confirming that you are the correct contact person or informing us of an alternative contact person/s together with their details;
- ✓ confirm that the updates we send are communicated to the appropriate people within your organisation/business.

It is very important that we confirm this information which is required by Department of Planning and Environment (DP&E).

Please respond via either:

E-mail : Peter.Archibald@vivaenergy.com.au
SMS : 0420 963 269 (please include the organisation you are texting from)
Phone : +612 9897 8839

We'd like to hear from you by 7 August as we have further updates we will be sending you shortly. If we don't hear from you we will assume you are the correct person to contact and the next update will be sent to you.

You can find out more information about this project by visiting our website at
<http://www.vivaenergy.com.au/operations/clyde/conversion-project>.
