

Clyde Terminal Community Notification

UPCOMING PEST ERADICATION PROGRAM AT CLYDE TERMINAL

ABOUT THE PEST ERADICATION PROGRAM

Viva Energy Australia Pty. Ltd. (Viva Energy) will be implementing a pest eradication program in accordance with a Pest Control Order issued by the NSW Environment Protection Authority (NSW EPA) at its Clyde Terminal, located at Durham Street.

There is a confirmed presence of foxes (European Red Fox) species which is a declared pest species under the Local Land Services Act 2013.

The European Red Fox is not a native species to Australia; it is an introduced pest and internationally recognised as one of the most serious threats to biodiversity.

Under the Local Land Services Act 2013, all land managers in NSW have an obligation to control declared pest species on their land.

WHAT TO EXPECT

The pest eradication program will commence on **Monday 12 February** and run for **eight weeks (until Sunday 8 April)**.

The pest eradication program will involve the use of baiting with a restricted pesticide, which is strictly used in accordance with directions given in a Pest Control Order.

The pesticide, known as 1080, will be placed within the fence line of the Clyde Terminal at targeted locations.

Signs informing the public about the eradication program have been placed along the fence line of the Clyde Terminal.

Domestic animals, such as dogs and cats, may be affected if they enter the site.

CONTACT US

Our aim is to carry out these works safely and to minimise any associated impacts to the community.

If at any time during the course of these works you have any queries, please contact us as follows:

John Quinnell - Clyde Terminal Conversion Project Regulatory Assurance Lead
