

NOTIFICATION OF UPCOMING PLANNED WORKS AT CLYDE TERMINAL

MAINTENANCE WORKS

We would like to advise our nearest neighbours that we are undertaking planned site equipment upgrades over the next few days (including this weekend) at the Clyde Terminal.

During these upgrades, we will also be testing the site's alarms.

The alarms are part of the Terminal's safety system and intended for on-site personnel only.

WHAT TO EXPECT

During these works, you may hear the site's alarms intermittently sound outside of the scheduled testing times.

The alarms are normally sounded at 12noon every Tuesday.

There is no need to take action if the alarms are sounded.

In the event that action needs to be taken, emergency services will direct our neighbours.

The works are planned to occur:
From Friday 16 August to Monday 19 August (including weekend).

CONTACT US

If at any time during the works you have any queries please contact us as follows:
